Video Security & Surveillance Solutions

Lenovo Pivot3® Video Smart City Infrastructure

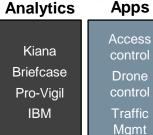

ADVANCED ANALYTICS Facial recognition, vehicle tracking and recognition, threat and crime detection, traffic monitoring, infrastructure monitoring and predictive maintenance.

BUILT-IN FAILOVER

Virtual servers restart with no user intervention during failures, and all previously recorded video remains accessible. No need for redundant software, licensing or hardware.

SCALABLE

Easily scale storage, compute, and bandwidth without disruption as requirements expand and change.

Virtual Servers

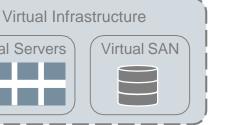

Access Drone

Milestone OnISS Genetec Verint Systems

VMS

VIDEO MANAGEMENT SYSTEM

Industry leading VIVIS software aggregates, stores and organizes video to both view live and access recorded video.

Pivot (3)

SOFTWARE DEFINED STORAGE Resources can be aggregated together into a single shared storage pool, fully accessible by all cameras and IOT applications.

ADVANCED FAULT TOLERANCE

Patented erasure coding protects data better than aging RAID technology, withstanding simultaneous failure of five disks an appliance.
