Arrow Reference Designs Featuring HPE Proliant Servers

DL360 G10

DL380 G10

DL20 G10

Includes all OEM SKUs. All CTO builds accepted.

Get to Market Faster

For OEMs and ISVs, managing computer hardware is challenging. Hardware is crucial to deliver their solution, ensure stable performance, and generate high customer satisfaction. Yet, there is less and less differentiation available in today's hardware designs. OEMs/ISVs can find themselves in a no-win situation where investment in hardware is critical but cannot provide a differentiated advantage.

Arrow's Reference Design offerings make your job easier with pre-designed and validated hardware platforms. We take the most popular models from leading brands, put them through our new product introduction process, and ensure readiness for scalable production. Arrow manages the lifecycle, selects the best component combinations for price and performance, and provides simple branding options.

Why HPE Proliant Servers for OEMs and ISVs

Arrow's portfolio of HPE Reference Designs meets the most common hardware requirements for OEMs and ISVs with solutions for many different verticals. The models selected are pre-validated and ready for production, saving you time and money while delivering a faster time-to-market.

HPE Rack Mount Servers

Platform	Processor	Memory	Storage	Power Supply	RAID Controller
DL360 Gen 10	2nd Gen Intel® Xeon® Scalable Family	24 DIMMs 3 TB Max Capacity	168.3 TB Maximum	2x 500W 2x 800W 2x 1600W	E208 Series P408 Series P816 Series
DL380 Gen 10	2nd Gen Intel® Xeon® Scalable Family	24 DIMMs 3 TB Max Capacity	459 TB Maximum	2x 500W 2x 800W 2x 1600W	E208 Series P408 Series P816 Series
DL20 Gen 10	Intel® Xeon® E-2200 Family, 9th Gen Core™ i3, and Pentium® G	4 DIMMs 64 GB Max Capacity	92.16 TB Maximum	1x 290W 2x 500W 2x 800W	E208 Series P408 Series

Arrow Goes Beyond the Basics

Arrow's Reference Designs are a solid foundation on which to build your offering. We extend this foundation with additional engineering and support services to enhance your offering, including:

– Customization services

– Advanced product management services

– Design and engineering services

– Software/hardware benchmark testing

– Field installation

– Post-sales technical support to end-users and partners

Our extended services offering expands your hardware design, development, and management capabilities. The Arrow team of experts works with your team bringing industry knowledge, best practices, and the scale of Arrow to your business.

> Arrow manages the lifecycle, selects the best component combinations for price and performance, and provides simple branding options.
