

Enabling Industry-leading Technology Solutions and Services for Retail and Hospitality

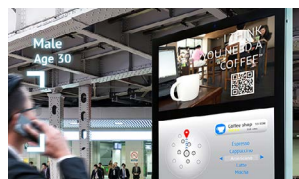

Customer demand and expectations are forcing change in retail and hospitality. For companies, technology has proliferated increasingly in running a business, increasing margins, and creating memorable, long-lasting customer experiences online and offline. At Arrow, our technologies and services help enable efficient operations from supply chain and inventory management to immersive experiences and store checkout systems. Whether you need cloud or edge architecture, a single device, or an omnichannel ecosystem, we have the solutions to suit your business needs.

Products and Technologies

AI-Enabled Solutions

Immersive customer experience, data-driven insight, increased buyer behavior visibility, and improved operations make it possible to connect with customers and transform data into actionable insights with AI-enabled solutions.

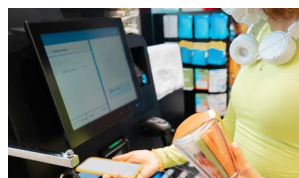

Digital Signage

Digital signage solutions deliver dynamic multimedia content and rich graphics for a customizable, interactive, and immersive customer experience. Increase engagement and drive sales and brand equity by leveraging platform intelligence and analytics.

Media Players

Media player technology enables rapid deployment of interactive media applications and creates timely, rich, dynamic, scalable visual content across various devices. Arrow's Seneca products include modular, flexible media players for simple, reliable, and scalable digital signage regardless of the application.

POS Systems & Kiosks

Intelligent, autonomous, self-service point-of-sale (POS) systems and kiosks allow customers to navigate their own shopping experience independently. At the same time, retailers can deliver engaging, intuitive, touchless, and even voice-enabled shopping to suit the desired customer experience.

Security

Whether health and safety related, store traffic monitoring, theft prevention, or surveillance, intelligent security technology helps protect and secure facilities, operations, and people.

Complete Life Cycle Services

Leveraging an extensive technology partner ecosystem, products and services portfolio, expertise, and scale, Arrow's Intelligent Solutions business builds solutions that simplify your technology lifecycle experience, enabling you to bring your products to market faster and grow your business.

System Design and Engineering

Expert system design capabilities and unparalleled experience in retail and hospitality solutions mean we can seamlessly design, validate, build, and test your product, accelerating your time to market.

Supply Chain Management

Efficient and effective supply chains are a vital part of every go-to-market strategy. Arrow's global services network with local on-the-ground support can serve you, your partners, and your customers with shipping, stocking, and pipeline forecasting when and where you need it.

Integration

Our world-class global integration centers are the single point of contact for your unique integration needs. Dedicated services include basic kitting, hardware configuration, complete rack enclosure set-up, and cabling.

Installation and Support

We develop customized installation support programs that suit your business and market requirements, covering everything from call center support to forward-stocking locations and onsite service.

Product Fulfillment

From simple procurement needs to international logistics – we can manage all your fulfillment needs.

Solution Benefits

- Improved forecasting and optimized inventory accuracy
- Differentiated and immersive customer experiences
- In-store personalization
- Customer insight-based decision making and precision targeting
- Increased loss prevention
- Store traffic and customer analytics

Our Technology Partners

Arrow's technical expertise and knowledge of the retail and hospitality industries allow us to deliver, implement and support full-stack technology solutions that span multiple domains. An ecosystem of world-leading technology providers back our solutions, including:
