

VEHICLE ANTENNAS FROM TE CONNECTIVITY

Modern vehicles rely on the very latest communication technologies to keep people and equipment safe and seamlessly connected everywhere. Antennas from TE Connectivity can help to meet and exceed that demand.

VEHICLE ANTENNAS

The antenna examples below are some of the common antennas available now directly from TE Connectivity or through authorised distributors. Customisations of existing products or new custom antennas may also be available on request.

FP40 ultra

Up to 14 port LTE/5G, Wi-Fi, GNSS and Bluetooth

5G Phantom

Single port global 5G coverage 617-7125 or 698-7125 MHz

FP20 auto

Up to 9 port LTE/5G, Wi-Fi 6E, GNSS

Vehicle Whip Antennas

Single port vehicle whip antennas for VHF, UHF and 700-900 MHz. Single, dual and tri-band options as well as ground plane required and ground plane independent options.

Barracuda

Up to 6-Port UHF / TETRA / 3G / 4G / 5G / ISM / Wi-Fi / GNSS

VersAnte Multi-Port Antennas

Combinations of 4G/5G cellular, Wi-Fi and GNSS coverage in extremely compact form factors (fin or puck).

Gar

Up to 5-Port 3G / 4G / 5G / ISM / Wi-Fi / GNSS

Trigger

4 or 5-port covert under-dash 3G / 4G / 5G / ISM / Wi-Fi / GNSS
