## CLoudHEALTH:

# The smarter way to manage multi-cloud

In a world where IT budgets are shrinking and digital transformation demands are accelerating; smarter cloud management isn't just a nice-to-have—it's essential. CloudHealth empowers FinOps teams to make better decisions faster, with full visibility, automation and control across multi-cloud environments. Because when your cloud gets smarter, your business gets stronger.

## Accelerate growth with the right tools

Your business can't grow on guesswork. And yet, poor data governance, siloed insights and spiraling cloud costs are holding back transformation. CloudHealth gives you the visibility and automation you need to do more with less, so growth becomes scalable, strategic and sustainable.

-  **See clearly across all environments.**  
Gain a unified view of cloud usage, performance and spend across AWS, Azure, GCP and hybrid environments.
-  **Make smarter financial decisions.**  
Get granular cost optimization insights, right-sized recommendations and forecasting tools to stay in control.
-  **Do more with fewer tools.**  
Centralize cloud governance, policy enforcement and reporting in one platform that scales with your business.

# SMARTER CLOUD IN ACTION: Key features & benefits

## Enhanced visibility

Track multi-cloud usage, performance, cost and security from a single pane of glass—turning noise into clarity.

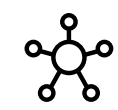

## Persona-based dashboards

Deliver tailored views to finance, engineering and IT leaders so they can act quickly on the insights that matter most.

## Reporting and analytics

CloudHealth offers robust reporting capabilities that deliver real-time insights into cloud spending, performance and security.

## Workflow automation

Reduce manual overhead with intelligent automation of key processes, alerts and optimization tasks.

## Governance and compliance

Enforce policies across your environments and maintain regulatory compliance without slowing down innovation.

## Scalability built in

CloudHealth grows with you, simplifying the complexity of increasing workloads and expanding teams.

## Customized experiences

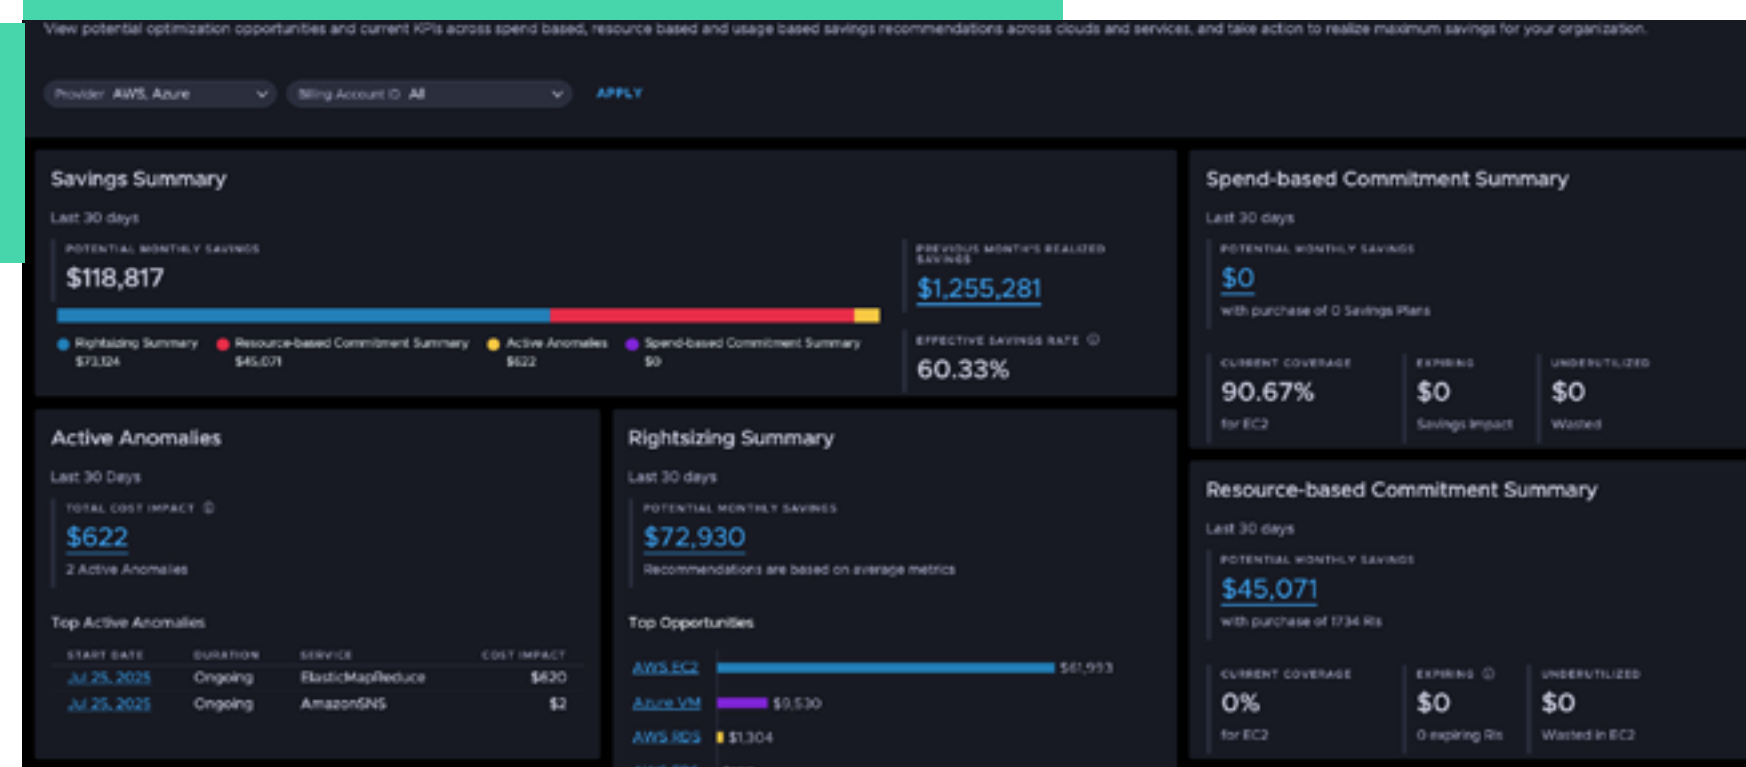

Personalize dashboards for FinOps teams with modular widgets, custom reporting, anomaly detection and commitment summaries.

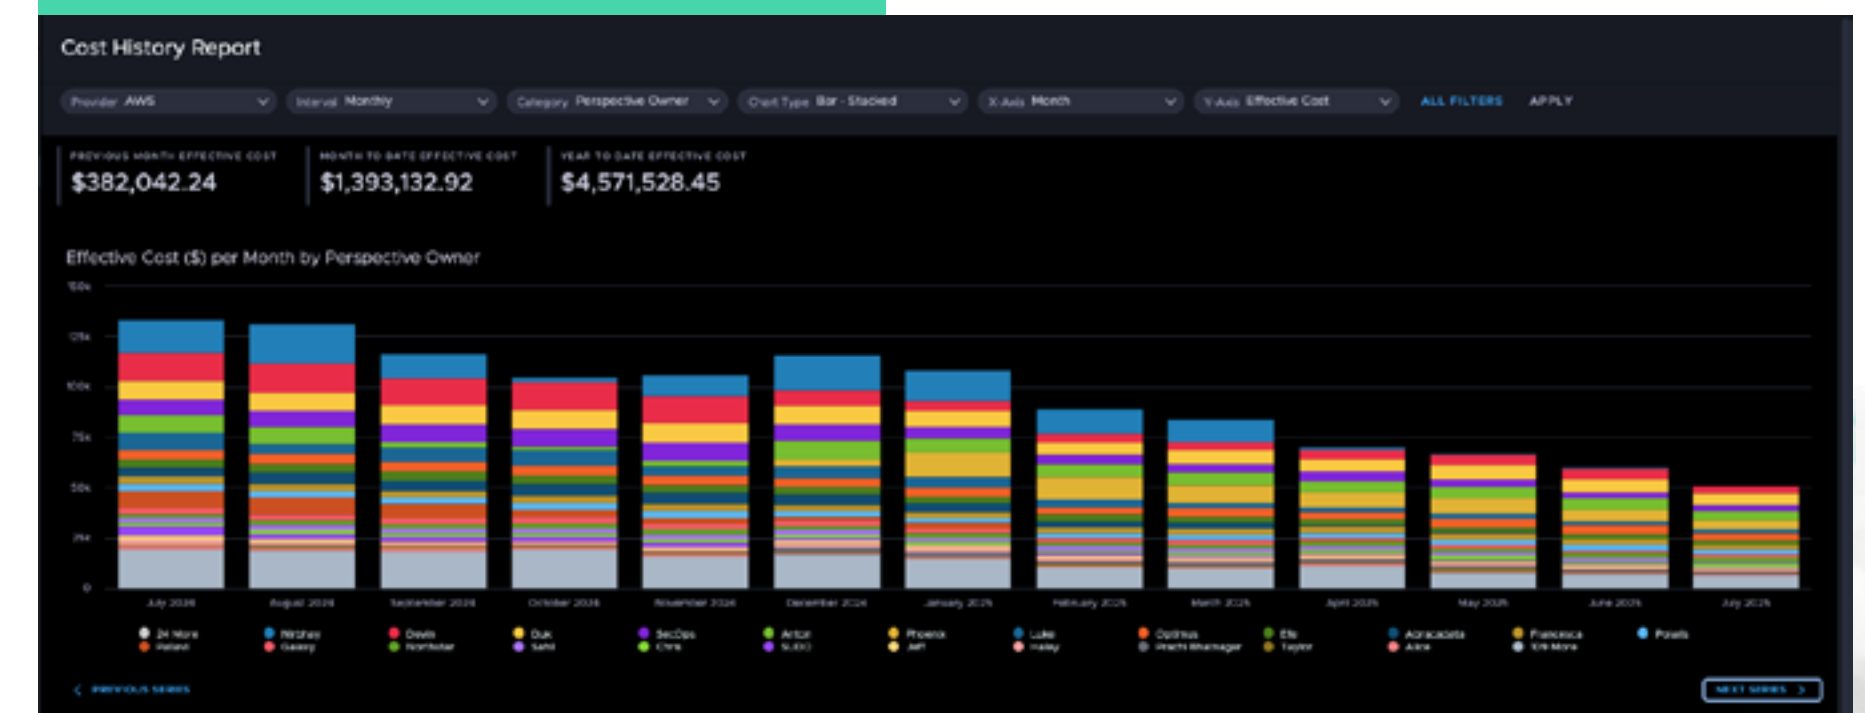

## Hands-on FinOps expertise

Work with dedicated specialists who guide your teams with tailored, cost-smart strategies.

### A tool for the entire FinOps team

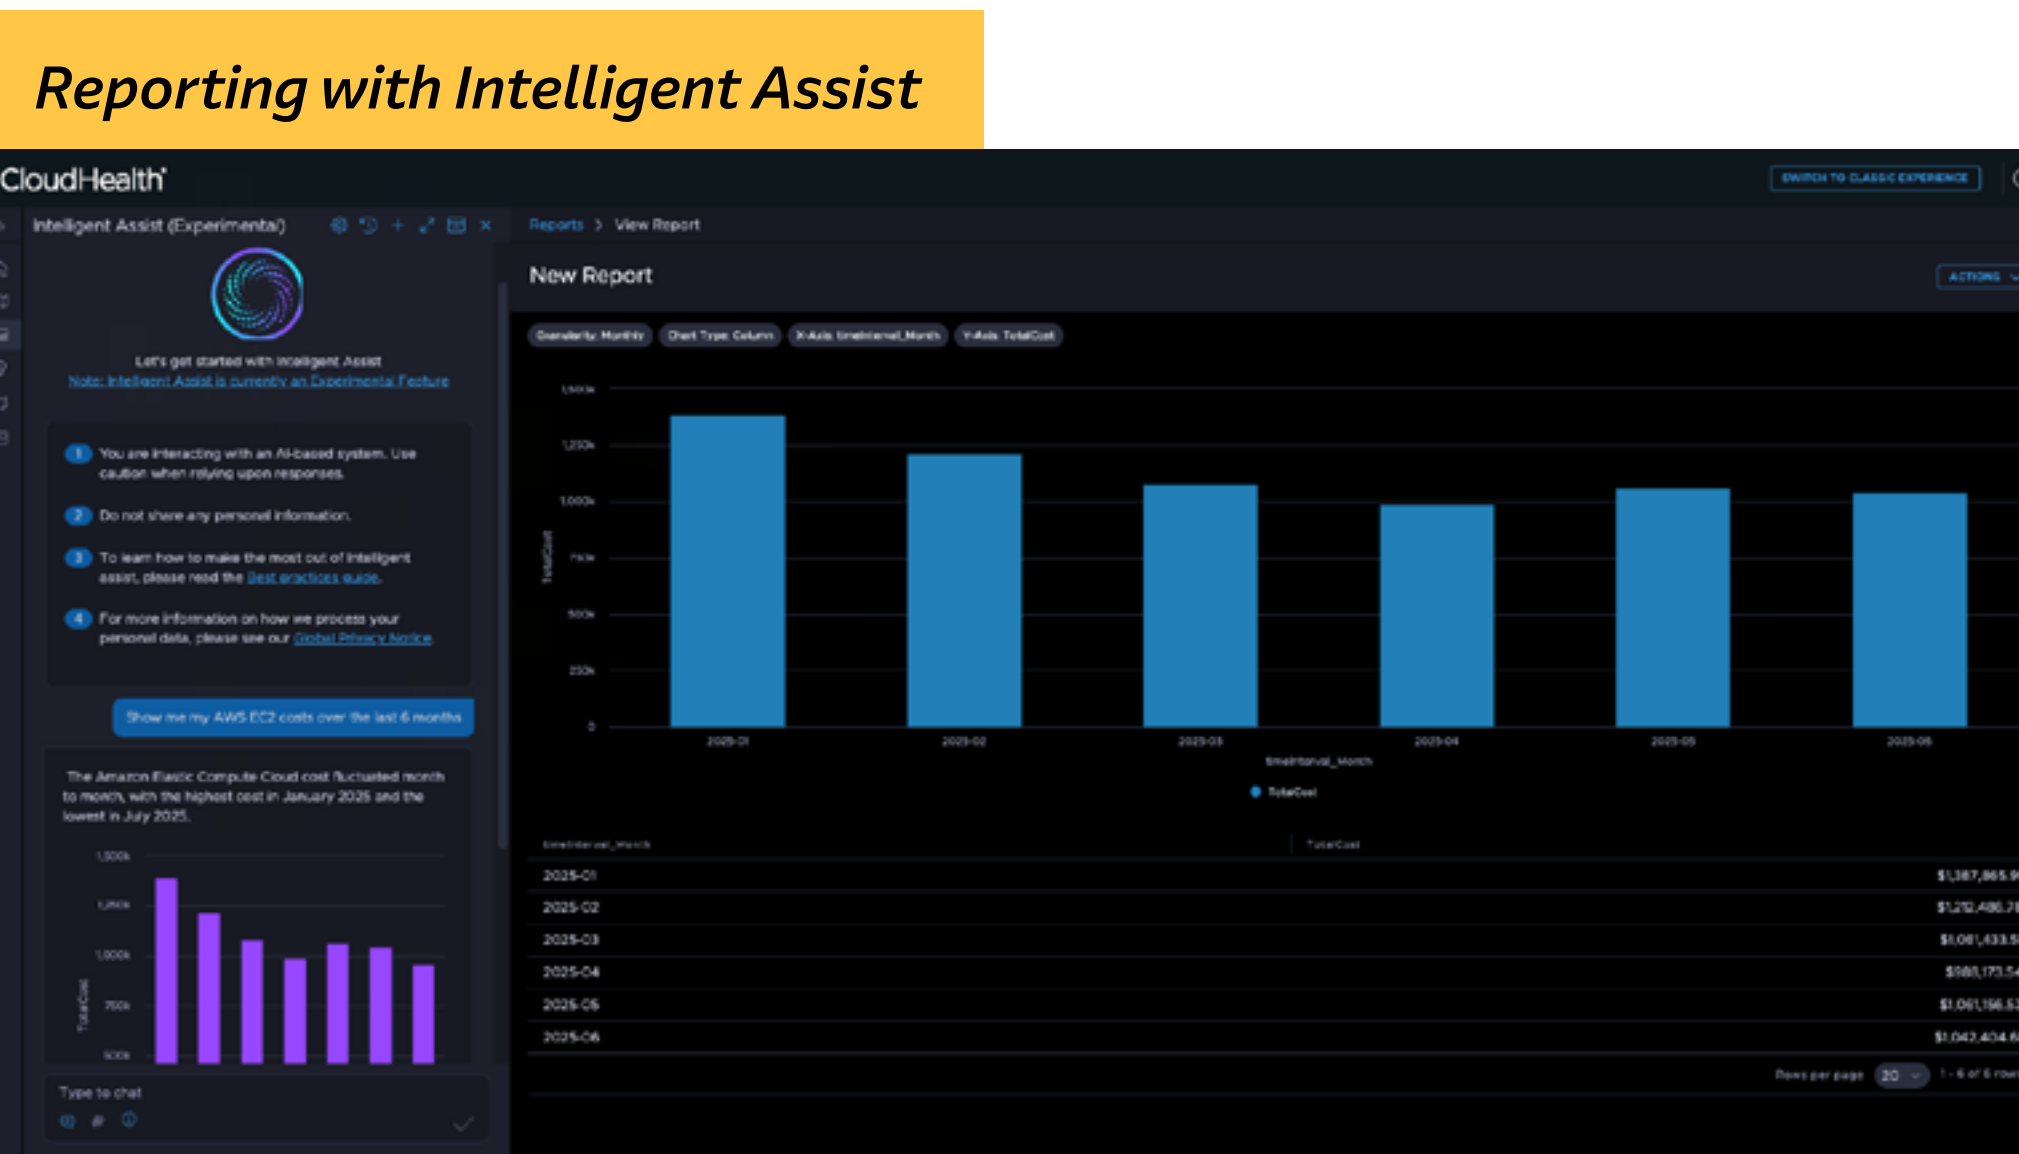

### Visibility across the board

# Seize the AI opportunity

AI initiatives thrive on data, but only when that data is visible, governed and actionable. With CloudHealth, your organization builds a foundation of clarity and control that unlocks the agility, security and performance needed to harness AI at scale.
