a subsidiary of immixGroup

## SEWP OVERVIEW

NASA SEWP VI – The NASA SEWP (Solutions for Enterprise-Wide Procurement), pronounced "soup", provides the latest Information Technology, Communication, and Audio-Visual (ITC/AV) solutions and services for all Federal Agencies and their approved contractors. Created in 1993, SEWP I was the first Government-Wide Acquisition Contract (GWAC) in the federal acquisition space. Originally, the contract vehicle provided only technology products for NASA and all other agencies. SEWP has continually evolved over the past 30 years, expanding its scope to meet the requests of its customers. The SEWP vehicle represents acquisition innovation within the Federal Government. The program is self-funded through usage fees (0.34%) and provides all Federal agencies with acquisition support- more than 50,000 orders a year.

## FAIR OPPORTUNTIY

FAR 16.505(b) (1) provides that each contractor shall be given fair opportunity to be considered for each order exceeding $10,000 and issued under multiple award contracts. The FAR states that the method to obtain fair opportunity is at the discretion of the Contracting Officer (CO) and that the CO must document the rationale for placement and price of each order. Using the SEWP online Quote Request Tool is the recommended method to assist in this activity and to augment the required decision documentation. The SEWP Quote Request Tool (QRT) will automatically include the Contract Holders within a selected Group or based on a suggested source.

## ABOUT IMMIXGROUP

immixGroup, an Arrow company, is a leading value-added IT distributor that delivers mission-driven results to the public sector through our vast partner ecosystem that includes 150+ manufacturers and 1,200+ solution providers. Together, we deliver innovative technology solutions, powering the future of public sector IT.

Since 1997, we have been committed to providing our manufacturers and solutions providers with the resources they need to navigate the ever-evolving government IT landscape, address their complex challenges and architect the best-of-breed solutions that produce mission-driven results.

Our innovative Growth Acceleration Framework, built on our own comprehensive market intelligence, provides the blueprint for delivering value on our business relationships. Through a continuum of services that go beyond the traditional resources our IT manufacturers and solution providers expect, we provide the expertise, knowledge and relationships that help them build their businesses and develop successful, enduring private-public partnerships.

Our regular delivery of market research and trend analysis is a strategic advantage to our ecosystem and allows them to develop winning strategies. This data-driven approach to marketing and smart lead generation enables more effective engagement with the right audiences to build robust pipelines. Partners rely on our extensive technical, integration and logistical capabilities to help them deliver complex technology solutions with confidence. Pre- and post-sales support and end-user training enable successful outcomes throughout the customer lifecycle.

We have a deeply rooted culture built on accountability, ethics and integrity, supported by ISO process certification. This results in a consistent, positive customer experience throughout the sales cycle. We thoroughly understand the complex acquisition process and hold 40+ contracts that allow federal, state and local agencies to easily acquire IT solutions, while complying with public sector rules and regulations. Newly available capital solutions from immixGroup help manufacturers and solution providers adapt to new business models, procurement methods and buying preferences.

## IMMIX PROGRAM SUPPORT

Customers seeking to issue RFQs should utilize the Quote Request Tool (QRT), found on the NASA SEWP VI website. However, all questions related to quotes, delivery orders, as well as policy and procedural information regarding installation, basic warranty, extended warranty, technical support, software support, and other post-delivery issues should be directed to immixGroup's NASA SEWP Program Management team:

immixGroup's NASA SEWP Program Management team will ensure timely response to the customer's inquiry by engaging the appropriate immixGroup sales representatives and internal teams to support the request. For additional information regarding immixGroup's NASA SEWP VI contract, please visit our dedicated website.

## ORDERING PROCESS

The internal ordering process of each Agency varies. The process and accompanying forms for Purchase Requests (PR) and Delivery Orders (DO) that are issued against a SEWP contract is defined by the issuing Agency, not the NASA SEWP Program Management Office (PMO). The typical process is for an end-user to determine a requirement and generate a Purchase Request (PR).

The PR along with any necessary funding information is sent to that Agency's procurement office which results in the issuance of a DO. Any valid Federal Agency DO form, and the associated Delivery Order number may be used. The NASA SEWP Program Management Office (PMO) does not issue DOs - these must be issued through the issuing Agency's procurement office. The SEWP Program Management Office (PMO) reviews, processes and tracks issued DOs and forwards them to the Contract Holder(s).

Some Agencies have special requirements for issuing IT Delivery Orders. It is the Issuing Agency's Contracting Officers' (COs/KOs) responsibility to be aware of any Agency-specific policies regarding issuing orders via an existing contract vehicle and Government-Wide Acquisition Contracts. There are no requirements under the SEWP Contracts for issuing Agencies to use other intermediary procurement offices, except as directed through their own internal policies.

If modifications are made to any order, these modifications must also route through the SEWP Program Management Office (PMO). Public sector organizations of all sizes trust immixGroup and their network of manufacturers and solution providers to deliver the critical technology solutions that enable them to achieve mission-driven results.

## WHAT'S IN SCOPE FOR SEWP VI?

SEWP is designed to provide a broad suite of Information Technology, Communication and Audio Visual (ITC / AV) solutions and services. The focus of SEWP is on the full suite of technology offerings that simplify Governmental access and Industry offerings across the entire ITC/AV solutions and services landscape. If you would like SEWP to determine if your requirement is within scope of the SEWP VI contract, please send an overview and/or bill of materials (BOM) to help@sewp.nasa.gov and they will quickly review and provide feedback.
